HIGHLIGHTS

PUBLIC AND FEDERAL GENERAL HOSPITALS

- As at March 31, 1984, there were 125 public and federal general hospitals in Alberta providing in-patient services to residents of the province. In addition, there were two ambulatory care facilities and three federal nursing stations which provided ambulatory care services only.

- During 1983-84, the number of approved adult and children beds in general hospitals remained virtually unchanged at 12,700 beds as at March 31, 1984. This approved bed complement provided a ratio of 5.4 beds per 1,000 population, remaining constant since the previous year.

- The average percentage occupancy of general hospitals dropped slightly from 70.1% in 1982-83 to 69.9% in 1983-84, and there was little change in average occupancy for all sub-groups as well. The average occupancy of hospitals in the 300+ bed category (large urban institutions) rose marginally to 74.8% from 74.1% in 1982-83, while the rate for the under 300 group declined from 65.3% to 63.8%.

- Adult and children separations per 1,000 population decreased by 1.0% from 174.1 in 1982-83 to 172.4 in 1983-84.

- In 1983-84, the average length of stay of adults and children separated from general hospitals was 7.9 days, which remained unchanged from the previous year.

- Adult and children patient-days per 1,000 population decreased by 0.8% from 1982-83 (1,391.7) to 1983-84 (1,381.1).

- The average daily number of in-patients in general hospitals was 8,872.9 in 1983-84, a slight decrease of 0.4% from 8,907.0 in 1982-83.

- The number of full-time equivalent employees in general hospitals, excluding medical staff, interns and residents, decreased from 28,840.5 in 1982-83 to 28,812.4 in 1983-84.

- Total paid hours per patient-day for full-time and part-time employees in general hospitals remained constant at 18.0.

- Total operating expense for public general hospitals was $1,228 million in 1983-84, averaging $378.98 per patient-day and $522.32 per capita.

AUXILIARY HOSPITALS

- There were 39 auxiliary hospitals in the province as at March 31, 1984, with an approved bed complement of 4,057 beds. These beds, together with the 462 beds found in long-term care units in public general hospitals, provided a ratio of 1.9 long-term beds per 1,000 population.

- The average occupancy of auxiliary hospitals increased from 91.5% in 1982-83 to 94.2% in 1983-84, due to a sharp rise from 90.1% to 94.9%, in the average occupancy of hospitals in the 100+ bed group (mainly urban hospitals, comprising 76% of the total bed capacity in auxiliary hospitals). The average occupancy of the under 100 bed group (primarily rural) fell from 96.2% to 91.9%.

- The number of patient-days per 1,000 population increased by 4.5% to 594.9 in 1983-84 from 569.2 the previous year.

- Full-time equivalent employees in auxiliary hospitals increased by 5.9% from 4,270.5 in 1982-83 to 4,522.2 in 1983-84.

- In 1983-84, total operating expense for auxiliary hospitals was $159.2 million, averaging $106.42 per patient-day and $67.69 per capita.

MENTAL HEALTH HOSPITALS

- Effective December 23, 1982, the administration of the two mental health hospitals was transferred from the Minister of Social Services and Community Health to the Minister of Hospitals and Medical Care.

- The approved bed complement of the two facilities was 1,053 as at March 31, 1984, providing an average of 0.4 beds per 1,000 population.

- The total operating expense of the mental health facilities was $69,680,824, averaging $206.41 per patient-day and $29.63 per capita.

NURSING HOMES

- As at March 31, 1984, there were 83 nursing homes in the province, with an approved capacity of 7,590 beds. This capacity provided a ratio of 42.6 beds per 1,000 population 65 years of age and older, an increase of 2.2% from a ratio of 41.7 as at March 31, 1983.

- The average length of stay of patients still-in nursing homes as at March 31, 1984 was 1,203.0 days, or 3.3 years. This represented no change over 1982-83.

GENERAL NOTES

The statistics presented in this publication are compiled from information submitted to the Department of Hospitals and Medical Care by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, as shown in Tables 1 to 46, are derived from the Annual Return of Health Care Facilities - Hospitals - Parts One and Two for the year ended March 31, 1984. The data include all amendments and corrections submitted to the Department by individual hospitals on or before April 4, 1985. The financial data presented in Tables 34 to 46 are compiled and reported on an accrual basis. Tables 34, 35, 39, 40 and 44 contain unaudited expenditure data, while Tables 36 to 38, 41 to 43, 45 and 46 contain audited data for operating income and operating expense as certified and reported by the external auditor of the hospital. It should be noted that the data for operating surplus or deficit of hospitals in Tables 38, 43 and 46 do not necessarily represent the final surplus or deficit of the hospitals for the year, as determined and approved by the Department, due to adjustments to total operating income and expenditure made subsequent to the receipt of the audited statements. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

Nursing home operation and patient data, as shown in Tables 47 to 55, are derived mainly from nursing home claims payment statistics for the fiscal year 1983-84 and include all amendments and corrections submitted to the Department by individual nursing homes on or before April 4, 1985. The exceptions to this are columns 1 and 2 of Table 47 which are obtained from the nursing home contracts and the Alberta Nursing Home Plan, Monthly Information Report for the year ended March 31, 1984, respectively.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In these tables, the facilities have been arranged in ascending order of approved bed complement within each facility group. An alphabetical listing for each type of facility can be found at the end of the supplement.

Note: All rates shown in the following tables have been rounded to one decimal place.
